

Technologies Used

APIs Used

Python for S60 (pys60) is used to develop this interactive application.

Network Services Used

The application uses network-dependent messaging service for sending SMS as required in the Swasthya and Adhikaar modules.

Phone Features

The application also makes use of the in-built **text-to-speech** and **video-player** facility in Symbian phones.

Testing & Beta Development

- The application is thoroughly tested on **Symbian 3rd Edition emulator** (Symbian 9.3 SDK toolkit) with Python support.
- The application is found to work seamlessly well during the multiple trials on **Nokia E50** device with a **Python interpreter** installed on it.
- The team has also tried the application on **Symbian S60 First & Second Edition** OS phones and has achieved success.
